Chris Stefan

Senior AI Engineer | Production Agentic AI | Remote-Ready | Open to Full-Time, Contract & Consulting

SUMMARY

AI Engineer with 5 years building production AI at the intersection of artificial intelligence and institutional finance. Lead developer & technical owner of PSP Investments' flagship agentic AI platform — 300 total users, 100 active & recurring, platform showcased at the Databricks Data & AI Summit. Full-stack ownership: architecture, SDK design, UI, onboarding, and stakeholder management across all asset classes. EU citizen with right to work in the EU; no sponsorship required. Seeking senior, lead, or consulting roles to build high-impact AI products.

EXPERIENCE

Senior AI Engineer, AlphaScience — PSP Investments

Sep 2022 – Present · Montreal, QC

- Engineered and owned the full stack of PSP's agentic AI platform — from initial POC through system architecture, design documentation, UI/UX, feature development, SDK packaging & distribution, PR reviews, and ongoing maintenance; 100+ active analysts in daily workflows, cutting research cycles ~10× and supporting 20–30% broader name coverage.
- **AlphaScience SDK:** wraps Databricks (Vector Search, SQL Warehouses, Genie Agents) & OpenAI (Responses + Files API), auto-auth via Databricks CLI & Azure Key Vault — composable agent/workflow base-class framework, proprietary tracing, inter-agent persistence, pre-built financial utility agents & skills; one-liner to spin up an agent or query a vector index
- **Virtual Analyst Platform:** custom chatbot UI with step-level tracing & observability (reasoning trace, web search, RAG retrieval, parallel tool execution, subagents), source traceability, structured data persistence layer with sandboxed analysis & live plotting, long-running workflow launcher & scheduled task subscriptions
- **Living roadmap:** weekly-evolving priorities with rapid integration of bleeding-edge AI developments into production — each feature independently scoped, designed as an SDK tool, and surfaced through the platform from concept to deployment
- **Cost impact:** in-house platform (~$1M/year all-in: data, infrastructure & engineering) displaces enterprise tooling priced at ~$20K/analyst/year (e.g., AlphaSense: $1.2M/year for 60 licenses) — at 100+ active users, avoided spend exceeds platform cost and scales with every analyst onboarded
- **Leadership:** platform selected for live demo at Databricks Data & AI Summit; mentored interns to ship production features independently; led onboarding for 100+ analysts; direct collaboration with C-suite across all asset classes

Analyst, Digital Innovation — PSP Investments

Sep 2021 – Aug 2022 · Montreal, QC

- Co-developed **Earnings Prediction Engine** (ML beat/miss pipeline, point-in-time data, Power BI) and quantitative equity strategy for $8B active portfolio (+125 bps/year); built alt-data pipeline with data profiling, cleaning & feature engineering for equity factor research; delivered POC analyses to drive stakeholder buy-in across asset class teams

Intern, Information Security — PSP Investments

May 2021 – Aug 2021 · Montreal, QC

- Enterprise risk framework implementation; automated risk assessment repository updates, improving data currency and reporting efficiency

Cybersecurity | Risk Analysis

Business Analyst — Lunch à Porter

Jun 2020 – Jun 2021 · Montreal, QC

- SEO & A/B testing drove 2× online conversion rate; inventory analysis for data-informed merchandising decisions

PERSONAL PROJECT

digithings.ai · **github.com/digithings-ai**

Fully modular multi-agent AI toolkit. LangGraph orchestration, LiteLLM universal LLM wrapper, pluggable RAG backends, built-in evals, Docker deployment, MCP & Open WebUI integration, OpenClaw layer for autonomous agent deployment. Direction: "hedge fund in a box" — merging agentic AI with quantitative finance.
