

Chris Stefan

Senior AI Engineer | Custom digithings applications | Open-source AI infra, no lock-in | Open to contract

SUMMARY

I build custom digithings applications for companies that want an AI story and AI infrastructure they actually own. digithings is open-source, modular AI infra (RAG, agents, chat, quant) with no vendor lock-in: your hosts, your keys, your models. Public proof is Olympus / digiquant, a research-to-paper-book pipeline on that same stack. The pattern I ship for desks: agentic research and workflow layers on the terminals, data, and research systems they already run. No rip-and-replace. Senior AI Engineer at PSP Investments (Sep 2022 – 28 Aug 2026), based in Italy (EU citizen, remote-ready). Open to contract. English, French, and Romanian at native level. digithings.ai · digiquant.io · github.com/chrizefan

EXPERIENCE

Senior AI Engineer

Alpha Science · PSP Investments · Montreal, QC Sep 2022 – 28 Aug 2026

- Owned production agentic AI used in analyst and PM research workflows: custom UI with step-level tracing and source traceability, a launcher for named analyses, and the in-house SDK underneath.
- Alpha Science SDK:** composable agents and RAG indexes on the firm's existing data and model stack (Databricks, OpenAI, Azure), with artifact export and sub-agent delegation.
- Shipped weekly: each capability scoped as an SDK tool and surfaced in the platform, from design through maintenance and intern mentorship.
- Pattern: AI on top of the desk's current terminals and research systems, not a rip-and-replace. Platform demoed at the Databricks Data & AI Summit.

Agentic AI RAG Orchestration Azure AI Evals Observability

Analyst

Digital Innovation · PSP Investments · Montreal, QC Sep 2021 – Aug 2022

- Co-developed **Earnings Prediction Engine** (ML beat/miss pipeline, point-in-time data, Power BI); built alt-data pipeline with data profiling, cleaning & feature engineering for equity factor research; delivered POC analyses to drive stakeholder buy-in across asset class teams

Quant Strategy Alt Data ML Pipelines Power BI scikit-learn

Intern

Information Security · PSP Investments · Montreal, QC May 2021 – Aug 2021

- Enterprise risk framework implementation; automated risk assessment repository updates, improving data currency and reporting efficiency

Cybersecurity Risk Analysis

Business Analyst

Lunch à Porter · Montreal, QC Jun 2020 – Jun 2021

- SEO & A/B testing drove 2× online conversion rate; inventory analysis for data-informed merchandising decisions

SEO A/B Testing Shopify Lightspeed Analytics

PERSONAL PROJECTS

digithings · GitHub ↗

Open-source, modular AI infrastructure — RAG, agents, chat, quant — with no vendor lock-in. Custom applications on top for teams that want an AI story and AI infrastructure they own. MIT. digithings.ai · github.com/digithings-ai

Olympus / digiquant · digiquant.io ↗

Public proof of digithings in finance: a quant research desk in a glass box you own. Scheduled research and timestamped signals (Atlas, Hermes), Olympus as the live-valued research book, deterministic backtests. Paper and live execution are not claimed.

Custom desk AI

Agentic research and workflow layers on a desk's existing terminals and research stack. Source-traced answers, named analyses, the client owns the code. Built as digithings applications, not a locked SaaS seat.
