

Chris Stefan

Senior AI Engineer | Production Agentic AI | Forward Deployed | Remote-Ready | Open to Contract

ABOUT

Senior AI Engineer with production tenure owning agentic AI platforms end-to-end — architecture, SDK, UI, shipping, and iteration with the desks that depend on them. I identify what matters, scope it, and ship it; I move fast without sacrificing rigor or trust. What drives me is production AI that genuinely matters: the work, the team, and the impact. I build digithings — open-source AI infra and custom applications clients own, no vendor lock-in — with digiquant as public proof in finance. Based in Italy; EU citizen; remote-ready. Open to contract when teams need that help.

PROJECTS

digithings.ai

Self-hosted AI infrastructure you deploy and own — a modular, open-source foundation for production agentic applications on your hosts, your keys, and your models. Swap providers and backends in configuration; no vendor lock-in. Custom applications sit on the same stack and stay with the client.

- DataTap Stream Chat** — embedded DigiChat on a client's product documentation; support chat and developer/docs chat on the site.

digiquant.io

AI finance toolkit and self-hosted quant desk: automated research, portfolio management, and strategy execution workflows — from research through reproducible backtests on infrastructure you own.

- FX Hub** — FX research hub built with traders to automate bank/broker research intake, extract consensus views, and surface trade ideas for decision-making.

EXPERIENCE

Senior AI Engineer

Alpha Science · PSP Investments · Montreal, QC

Sep 2022 – Aug 2026

- Owned the full stack of PSP's company-wide agentic AI platform for analysts and PMs: architecture, design documentation, and UI/UX from concept to deployment; feature development, SDK packaging & distribution, PR reviews, and ongoing maintenance — source-traced answers in daily research workflows.
- Alpha Science SDK:** wraps Databricks (Vector Search, SQL Warehouses, Genie Agents) & OpenAI (Responses + Files API), auto-auth via Databricks CLI & Azure Key Vault. Composable agent/workflow base-class framework on the firm's existing stack, proprietary tracing, inter-agent persistence, pre-built financial utility agents & skills; artifact export (Office docs & web pages), sub-agent delegation with to-do planning, and parallel tool execution.
- Virtual Analyst Platform:** custom chatbot UI with step-level tracing & observability (reasoning trace, web search, RAG retrieval, parallel tool execution, subagents), source traceability, structured data retrieval & manipulation with sandboxed analysis, live charting (Plotly/Dash/ECharts) & exportable dashboards, workflow launcher & scheduled tasks.
- Agile roadmap:** weekly-evolving priorities with rapid integration of emerging model and tooling capabilities into production. Each feature independently scoped, designed as an SDK tool, and surfaced through the platform from concept to deployment.
- Leadership:** direct collaboration with C-suite across all asset classes; mentored interns and juniors to ship production features independently; coached Alpha Science SDK users; platform demoed at the Databricks Data & AI Summit.

Agentic AI RAG Orchestration Azure AI Evals Observability

Analyst

Digital Innovation · PSP Investments · Montreal, QC

Sep 2021 – Aug 2022

- Co-developed **Earnings Prediction Engine** (ML beat/miss pipeline, point-in-time data, Power BI); built alt-data pipeline with data profiling, cleaning & feature engineering for equity factor research; delivered POC analyses to drive stakeholder buy-in across asset class teams

Quant Strategy Alt Data ML Pipelines Power BI scikit-learn

Intern

Information Security · PSP Investments · Montreal, QC

May 2021 – Aug 2021

- Enterprise risk framework implementation; automated risk assessment repository updates, improving data currency and reporting efficiency

Cybersecurity Risk Analysis

Business Analyst

Lunch à Porter · Montreal, QC

Jun 2020 – Jun 2021

- SEO & A/B testing drove 2× online conversion rate; inventory analysis for data-informed merchandising decisions

SEO A/B Testing Shopify Lightspeed Analytics
