EXPERIENCE

Senior AI Engineer

Alpha Science · PSP Investments · Montreal, QC Sep 2022 – 28 Aug 2026

- Owned the full stack of PSP’s company-wide agentic AI platform for analysts and PMs: architecture, design documentation, and UI/UX from concept to deployment; feature development, SDK packaging & distribution, PR reviews, and ongoing maintenance — source-traced answers in daily research workflows.
- Alpha Science SDK:** wraps Databricks (Vector Search, SQL Warehouses, Genie Agents) & OpenAI (Responses + Files API), auto-auth via Databricks CLI & Azure Key Vault. Composable agent/workflow base-class framework on the firm’s existing stack, proprietary tracing, inter-agent persistence, pre-built financial utility agents & skills; artifact export (Office docs & web pages), sub-agent delegation with to-do planning, and parallel tool execution.
- Virtual Analyst Platform:** custom chatbot UI with step-level tracing & observability (reasoning trace, web search, RAG retrieval, parallel tool execution, subagents), source traceability, structured data retrieval & manipulation with sandboxed analysis, live charting (Plotly/Dash/ECharts) & exportable dashboards, workflow launcher & scheduled tasks.
- Agile roadmap:** weekly-evolving priorities with rapid integration of bleeding-edge AI developments into production. Each feature independently scoped, designed as an SDK tool, and surfaced through the platform from concept to deployment.
- Leadership:** direct collaboration with C-suite across all asset classes; mentored interns and juniors to ship production features independently; coached Alpha Science SDK users; platform demoed at the Databricks Data & AI Summit.

PERSONAL PROJECTS

[digithings.ai](#) · [GitHub](#) ↗

Modular multi-agent AI toolkit — the infra you deploy and own (RAG, agents, chat, quant). LangGraph, LiteLLM, pluggable RAG, evals, Docker, MCP & Open WebUI, OpenClaw. Custom digithings applications; MIT; no vendor lock-in.

[Olympus / digiquant](#) · [digiquant.io](#) ↗

Public proof in finance: research → thesis → paper book. Olympus as the live-valued research book (Supabase, Next.js); Atlas & Hermes for scheduled research and timestamped signals; deterministic backtests. Paper and live execution are not claimed.

[DataTap](#) · [datatap.stream/chat](#) ↗

Live digichat embed on product docs so users can chat the solutions documentation — public digichat proof in the wild.

Custom desk AI

Forward-deployed agentic layer on the desk’s current terminals and research stack. Source-traced answers; they keep the code. Built as digithings applications.
